

Tubular centralizer TsT

The Tubular centralizer TsT is used for centralizing of coiled tubing tool assembling in tubing joint.

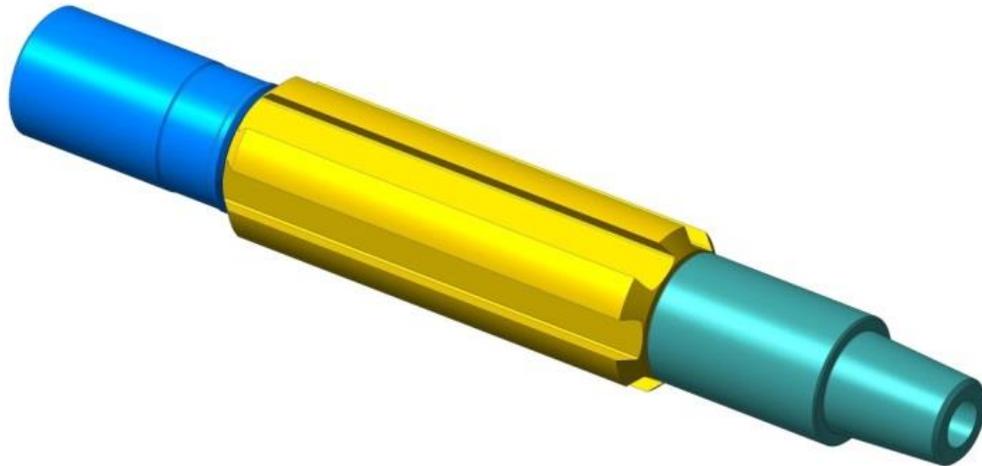

Fig. 2

The Tubular Centralizer presents an assembly of body, sub and centralizer. Centralizer can rotate around body axis. The tool can be used with changeable centralizers for different standard sizes of tubing joints.

Code	Tubing joint size for centralizer	Diameter along centralizer, in	Diameter along body, in	Length, ft	Diameter of inner passage opening, in	Connecting thread	Weight, lb
TsT-69	<i>NKT-89</i>	<i>2.72</i>	<i>54,0</i>	<i>1.41</i>	<i>0.79</i>	<i>1,5 AMMT</i>	<i>14.75</i>
