

DRIFT DIAMETER GAUGE FOR TUBING TYPE SHP

The Drift Diameter Gauge for Tubing is designed to control inner diameter of tubing. It is a cylinder of required diameter with hole in the center. In order to reduce weight of construction there is a groove on body and the tool is made of aluminum alloy D16 (aluminium wrought alloy).

Code	D, in	Length L, ft	Weight, lb
SHP-50x300	2.0	1.64	4.63
SHP-80x300	3-3/16	1.64	11.46
